Physical geography of asia worksheet

In order to continue to enjoy our site, we ask you to confirm your identity as a human. Thank you so much for your cooperation. 7. Asia's geography is astounding: about a third of the Earth's population lives in Asia. That's over two billion people! Most of Asia's population lives in China and India. China has an estimated 1.3 billion people and India, 1.1 billion. Asia also covers a third of the Earth's territory. In all respects, then Asia is the largest continent in the world. Can you believe that Asia's total mass of land is larger than the entire moon? Asia is pretty incredible. Part of the reason Asia is so unique is due to its physical geography. Tectonic plate movements shaped by vast mountains and volcanic activity millions of years ago produced thousands of islands in the Pacific Ocean. The land part of Asia is cross-bordered by an extensive mountain range along the coast. Fertile river plains can be found scattered among the mountain ranges. This is the land of contrasts. In Asia, you can go from the quiet and tranquil beauty of the coastlines, to ice-capped mountain peaks, and rolling green landscapes to electric cities pulsating with the latest technology and buzzing with intense energy! Asia is full of sweltering jungles full of wildlife and snow-covered hills, perfect for skiing. But if for no other reason, Asia is simply cool because it is the native home of the panda bear! Students will have fun learning everything about the mysterious continent known as Asia. This unit routine has two different projects and many map activities. As always, these resources are free and ready to download in the classroom! Conditions of unit 7: Physical geography of Asia Unit 7: PowerPoint presentation Unit 7: PowerPoint filling in your notes Blank sketch map of Asia Activity to go with the map above Unit 7: Asia Travel Journal Project Unit 7: Asia Travel Journal Project Rubric Unit 7 Study Guide Map Quiz East Asia physical geography map test South Central Asia Physical Geography Map Test Southeast Asia Physical Geography Map Test Middle East Asia Physical Geography Map Test Unit 7: Asia Country Project Unit 7: Asia Country Project Rubric Unit 7 Test Guide Unit 7 test Returning from Asia's physical geography to the geography of the world Home © Copyright OwlTeacher.com all rights reserved. Encyclopedic entry. Asia is the largest continent in the world. It can be divided into five main physical regions: mountainous systems; plateaus; plains, steppes and deserts; freshwater environments; and the saltwater environment.
